DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The cited references fail to disclose or suggest implanting ions of the first conductivity type into the ion well to form a first electrode of the P-N junction varactor in the active area, and the first electrode being adjacent to the isolation structures; forming a second electrode of the P-N junction varactor of a second conductivity type on the substrate to cover portions of the doping region, the second electrode being a doping layer; and forming a salicide on the first electrode and the second electrode as required by present Claims 1-9. Moreover, the cited references fail to disclose or suggest implanting ions of a second conductivity type into the substrate to form at least a third ion well in the first region; forming a plurality of isolation structures on the substrate; forming a first gate on the first ion well and a second gate on the third ion well, implanting ions of the first conductivity type into the substrate to form two first lightly doped drains on the third ion well, and simultaneously form a doping region on the second ion well; and implanting ions of the second conductivity type into the substrate to form two second lightly doped drains on the first ion well as required by present Claims 10-16. Therefore, Claims 1-16 are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
